Min. R.H (%)	50	50	55	55	65
Wind speed (km/hr)	10	10	10	15	20
Wind direction	Easterly	Easterly	Easterly	Easterly	Easterly

AGRICULTURAL ADVISORY BASED ON WEATHER FORECAST

Crop	Stage	Advisory (Based on weather forecast)
Rice	Milking stage	- Considering the possibility of light to moderate rain in the next five days, farmers are advised to wait for irrigation in paddy crops. - Monitoring of Gundhi bug is advised in early sown rice crop field, which reaches in grain forming stage. It causes appreciable losses to crop grains during milking stage. As a result, individual rice grain becomes white and chaffy. If 1-2 bugs/hill are seen in the field then, apply Folidol powder @10- 15 kg/ha to control Gundhi bug in the early morning or late evening.
Kharif Maize	Harvesting	In view of the possibility of light to moderate rain in the next five days, farmers are advised to wait for harvesting of maize crop.
Lemon		To control the citrus canker disease in Lemon plant, soil drenching with copper oxychloride @ 5g per liter water and foliar spray of the same chemical

		@ 2.5g per liter water should be advised 2-3 times under clear weather condition. Under severe diseased condition the plant should be uprooted.
Brinjal/cauliflower/ cabbage		Farmers are advised for transplanting of brinjal, cabbage and cauliflower seedling on the ridges.
Animal Husbandry		Farmers are advised to give deworm medicine to every animal at the end of the rainy season.
Note: -Farmers those are using android mobile, should download the Damini app for early alert about the thunderstorm and lightning, Meghdoot app for weather based agro-advisories, Mausam and Rain alarm app for Thunder/Rain.
